F1000 Digital Frequency Calibrator

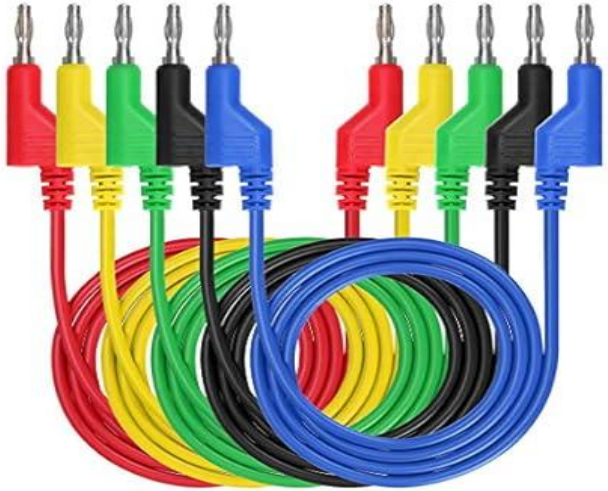

The **F1000 Digital Frequency Calibrator** is designed for high-precision calibration, ensuring accuracy across frequency meters, frequency counters, wave-meters, oscilloscope / multi-meters / clamp meters (only frequency). With a **frequency range up to 1 MHz**, and **0.005% best-in-class accuracy**, it provides reliable calibration for professionals. Featuring **LCD display**, and support for **permanent, site, and mobile calibration**, it guarantees efficiency and convenience. Whether used in laboratories or on-site, the F1000 delivers consistent and dependable results, upholding industry standards and enhancing measurement precision.

PRECISION PERFECT

Digital Frequency Calibrator Includes

Test Leads and Power cord

F1000 Digital Frequency Calibrator – Ideal for frequency meters, frequency counters, wave-meters and oscilloscopes / multi-meters / clamp meters (only frequency) calibration.

FUSION

PRECISION PERFECT

Key Features

- Frequency capability **up to 1 MHz**
- **Best-in-class 1-year accuracy specification:** 0.005%
- Ideal for **permanent, site, and mobile calibration** applications
- Rugged, light in weight and small in size without compromising accuracy

Versatile Workload Compatibility

- **F1000** Supports calibration for frequency meters, frequency counters, wave-meters and oscilloscopes / multi-meters / clamp meters (only frequency)

Technical Specifications

Range:

- **F1000:** 10 Hz to 1 MHz

Best 1-Year Accuracy Specification:

- **10 Hz to 1 MHz:** ±0.005% of reading

Best Temperature Coefficient:

- **15 PPM/°C**
