# R100X Resistance Calibrator

**R1000 High Precision Digital Resistance Calibrator**

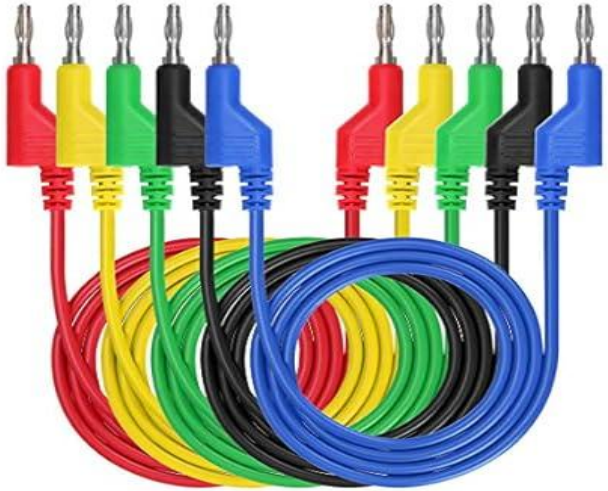

**R1001 High Resistance Standard Box**

The **R100X Resistance Calibrator** is designed for high-precision calibration, ensuring accuracy across resistance meters, insulation testers, and meg-ohm meters. With a **resistance range up to 20 GΩ**, and **0.02% best-in-class accuracy**, it provides reliable calibration for professionals. Featuring **LCD display**, **dual power modes (battery & AC mains)**, and support for **permanent, site, and mobile calibration**, it guarantees efficiency and convenience. Whether used in laboratories or on-site, the R100X delivers consistent and dependable results, upholding industry standards and enhancing measurement precision.

PRECISION PERFECT

# Resistance Calibrator Includes

Test Leads and Power cord

**R1000 High Precision Digital Resistance Calibrator** – Ideal for resistance meter and digital multi-meter calibration.

**R1001 Mega-ohmmeter Calibrator** – Designed for insulation testers, meg-ohm meters, and high-voltage resistance calibration.

FUSION
PRECISION PERFECT

## Key Features

- High resistance capability **up to 100 MΩ**
- Insulation resistance **up to 20 GΩ** (Voltage: 1 kV)
- **Best-in-class 1-year accuracy specification for High Precision Digital Resistance Calibrator:** 0.02%
- **Best-in-class 1-year accuracy specification for High Resistance Standard Box :** 0.55%
- **LCD display** showcasing both selected set value and calibrated value
- Ideal for **permanent, site, and mobile calibration** applications
- **Dual power mode:** Operates via internal **high-capacity rechargeable battery (Optional)** or **universal AC mains**
- Provides approximately **4 hours of continuous operation** on a single charge

## Versatile Workload Compatibility

- **R1000:** Supports calibration for **resistance meters, digital multi-meters, and earth resistance testers**
- **R1001:** Designed for **resistance meters, meg-ohm meters, portable and bench insulation testers, and meggers**

## Technical Specifications

FUSION
PRECISION PERFECT

**Range:**

- **R1000:** 10 mΩ to 100 MΩ
- **R1001:** 1 MΩ to 20 GΩ

**Best 1-Year Accuracy Specification:**

- **10 mΩ to 100 MΩ:** ±0.02% of reading
- **1 MΩ to 20 GΩ (at 1 kV):** ±0.55% of reading

**Best Temperature Coefficient:**

- **50 PPM/°C**
